Your printer may warn you that part of the page is "larger" than the paper. Ignore this warning and print as is!

Rhythm Basics Teaching Tips

Beat is the workhorse of music. Beat keeps music going.

Rhythm is the kitten winding its way around and through the footsteps of beat.

Possibly the easiest way to conceptualize rhythm is to connect with words or syllables in a song.

Learning about rhythm begins with attaching sound-words to notes that mimic their duration. Saying "taa" for a quarter note and "taa-aa" for a half note immediately differentiates their time values. The most commonly used notes are described below in their order of introduction to children.

musical notation	rhythm shortform sound-word	time value
quarter note 	taa one clap	1 beat in 4/4 time
eighth notes 	▭ ti-ti two claps	1 beat in 4/4 time
quarter rest 	⋈ shu both hands out to sides palms up	1 beat in 4/4 time
half note 	♪ taa - aa clap hands together then move in 1 circle	2 beats in 4/4 time
half rest 	■ shu - uu as per shu then shrug hands once	2 beats in 4/4 time
whole note 	● taa-aa-aa-aa clap hands together then move in 3 circles	4 beats in 4/4 time

pneumonic half rest is shaped like a hat 
 whole rest is like a hole in ground 

Templates for Grade 3 rhythms are provided in "Rhythm Patterns CanDo Music3"
